## MEMORANDUM

DATE: November 25, 1987  
TO: Jeanne Griffin  
FROM: Catherine Chaberski CC  
SUBJECT: Illinois/F05-8702-168/FIL0495SB  
Bourbonnais/Birmingham Bolt Co., Inc.  
(Illinois Plant)  
ILD980996862

This memorandum is in response to comments submitted by the Illinois Environmental Protection Agency (IEPA) dated November 2, 1987, regarding the Site Inspection Report prepared by Ecology and Environment/FIT on September 25, 1987, for the Birmingham Bolt (Illinois plant) site.

Ecology and Environment/FIT has reviewed these comments and taken them into consideration. The IEPA comments have been added to the site file. The IEPA questioned Part III, Section II in the following manner. If the section in question mentions only 3 cells, then why does the site sketch show 5 cells? The site sketch map (Figure 3) is included in the report to show only the location of the cells, not the quantity. The closure plan included all five cells, however, only the three completely filled cells had a definite waste quantity removed. Since cell D and E were never completely filled, the waste quantity could not be determined at the time of removal. An attempt to estimate the amount of soil contamination for cells C and D would be inaccurate.
